EDUCATION

GONO UNIVERSITY

BACHELOR OF SCIENCE IN CSE

CGPA: 3.91 / 4.00

April 2021 - April 2025

SKILLS

Backend & Infrastructure

- TypeScript, Node.js, Express.js, REST APIs, JWT, Authentication, Authorization, Fastapi
- PostgreSQL, MySQL, MongoDB
- Docker, Linux, Git

Frontend

- TypeScript
- React Js
- Next Js
- Tailwind css
- React Router
- CSS

AI / LLM Systems

- LLM Integration (OpenAI, Local Models)
- Retrieval-Augmented Generation (RAG)
- LangChain, ChromaDB, Vector Search

Data & ML

- Python (pandas, NumPy, sklearn, Matplotlib, Seaborn)
- Data Preprocessing, Feature Engineering

Core CS

- Data Structures & Algorithms
- OOP, System Design Fundamentals

SOFTWARE

Jira • MS Excel • MS PowerPoint • MS Word
LaTeX

LANGUAGE

Bangla • English

OBJECTIVE

Full-stack developer(Node.js backend focused) with 3+ years of professional experience building and maintaining REST APIs, authentication systems, and database-driven backend services using Node.js, Express.js, and SQL/NoSQL databases. Comfortable working with JWT-based authentication, Agile workflows, and cross-functional teams to design scalable, well-structured backend solutions.

EXPERIENCE

SPARKTECH AGENCY | BACKEND DEVELOPER

March 2024 – Current | Dhaka, Bangladesh

- Built and maintained backend services using Node.js, Express.js, and REST APIs, working with SQL/NoSQL databases including PostgreSQL and MongoDB.
- Implemented JWT-based authentication and authorization, and designed database schemas to support core business logic and workflows.
- Developed REST APIs and backend workflows for real-time data processing, automation, and third-party integrations, following Agile development practices.
- Worked on chat, search, and workflow-based product features using JavaScript (ES6+) and TypeScript to support user-facing business operations.
- Contributed to system design, development, deployment, and ongoing improvement of production applications, using Git/GitHub for version control.
- Construct REST APIs and backend workflows for real-time data processing and third-party integrations, applying asynchronous programming patterns (async/await, Promises) to handle concurrent operations efficiently.

PROJECTS

GRAMBIX | GitHub Source Code

- Developed a digital e-book and audiobook platform using Node.js, Express.js, and MongoDB, featuring scalable backend architecture and user content management

FIBREPRO | GitHub Source Code

- Construct a digital service management system using Node.js, Express.js, and MongoDB, featuring scalable backend architecture and user expense and invoice management

SANSALAND | GitHub Source Code

- Designed a multi-service providing system for pet owner and pet related service providers using Node.js and REST APIs, supporting teacher-class-student hierarchy, role-based access, and assignment workflows

HOTEL-AI-RECEPTIONIST-AGENT-VOICE-AND-MESSAGE |

GitHub Source Code

- Built a hotel guest support and booking system using FastAPI, MongoDB, and OpenAI GPT-4o
- Automated guest inquiries, room availability checks, booking creation, and cancellation across voice and messaging channels.
- Added admin tools for conversation tracking, booking management, and real-time operational updates.
