Kazi Md. Arif Ishtiaq

AI Full-Stack Engineer

Dhaka, Bangladesh | kazimdarifishtiaque@gmail.com | +880-1533-851345 | linkedin.com/in/ishtiaque9833 | github.com/mohammad-ishtiaque | portfolio

Objective

I'm a CS graduate, now studying NLP at an advanced level. Machine learning and deep learning pulled me in first, and generative AI has become a big part of that. I'm applying for the AI/ML internship at Cloudly to work on research projects and to learn what happens after a model is trained: deploying it, setting up MLOps, and keeping it running in production.

Skills

Languages: Python, JavaScript, TypeScript, , C++

AI & LLM Systems: ML, DL, NLP, Fine-tuning, LLM Integration (OpenAI, Gemini, local models), Retrieval-Augmented Generation (RAG), LangChain, ChromaDB, Vector Search, Claude Code for AI-assisted development

Backend: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, Authorization, Microservices

Frontend: React.js, Next.js, TypeScript, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & Infrastructure: AWS (EC2, S3), Docker, Nginx, PM2, Certbot, Linux, Git, GitHub

Core CS: Data Structures and Algorithms, Object-Oriented Programming, System Design Fundamentals

Experience

Senior Executive (Backend), Sparktech IT Ltd. *Mar 2025 – Oct 2026*
Dhaka, Bangladesh

- Built and deployed backend services in Node.js, Express, and FastAPI, working with PostgreSQL, MongoDB, and Redis across multi-tenant systems.
- Designed database schemas and JWT-based authentication and role-based authorization for client products.
- Built asynchronous, event-driven backend workflows for real-time data processing and third-party integrations, handling concurrent operations with Promises and async/await.
- Developed chat, search, and workflow automation features using JavaScript (ES6+) and TypeScript.
- Deployed and maintained production infrastructure on AWS EC2 with Nginx, PM2, and SSL (Certbot), using Git and GitHub for version control in an Agile workflow.

Trainer, Gono Bishwabidyalay Programming Club *Sept 2024 – Feb 2025*
Savar, Dhaka

- Trained beginner-level students on programming fundamentals and mentored them for competitive programming contests.

Projects

Hotel AI Receptionist Agent – Voice and Messaging *GitHub*

- Built an AI-powered hotel guest support and booking system using FastAPI, MongoDB, and OpenAI GPT-4o.
- Implemented workflows for guest inquiries, room availability checks, booking creation, and cancellations across voice and messaging channels.
- Developed administrative tools for conversation monitoring and booking management.

LLM-Based RAG-Powered Smart Library Management System *GitHub*

- Developed a document retrieval and question-answering system using FastAPI, LangChain, ChromaDB, PostgreSQL, and Next.js, integrating OCR-based document ingestion and the Gemini API.

Sansaland – Multi-Service Platform *Google Play*

- Developed backend services using Node.js and REST APIs to support pet owners and service providers, including role-based access control and service assignment workflows.

FibrePro – Financial Management Application *Google Play*

- Developed a financial management application for freelancers, tradespeople, and small businesses to manage work, expenses, and invoices. Reduce api response time 0.985ms to 0.677.
- Built backend services using Node.js, Express.js, and MongoDB, with React.js and Tailwind CSS for the web interface and Flutter for the mobile application.

Grambix – E-books and Audiobooks Platform *Google Play*

- Contributed to backend for mobile and web platform. The app discovering and accessing e-books and audiobooks across AI, business, productivity, and personal development.
- Worked with Node.js, Express.js, and MongoDB on backend services, alongside React.js, Tailwind CSS, and Flutter across web and mobile applications.

We-mama – Maternity Community Platform *GitHub*

- Developed the frontend using Next.js and TypeScript and integrated Agora for video conferencing to support real-time communication within the platform.

Education

MSc in Computer Science and Engineering, Jahangirnagar University *April 2026 – April 2027*

BSc in Computer Science and Engineering, Gono University *April 2021 – April 2025*

Additional Experience & Awards

- First Runner-up, Intra-University Programming Contest, Gono Bishwabidyalay Programming Club (2022)
- Participant, ICPC Asia Dhaka Regional Contest (2021, 2023, 2024)
- Second Runner-up, Jafarullah Chowdhury Memorial Debate Competition

Software: Jira, Git, MS Excel, MS PowerPoint, MS Word, LaTeX

Languages: Bangla, English

Profiles: LeetCode, HackerRank, CodeChef, Codeforces, CSES, ICPC ID
